Step 1: Change User Code (OPTIONAL)
If you wish to change your code, see instructions on reverse side.

Step 2: Prep Door for Installation with Template
1. Place template (supplied) on door and fold along door’s edge.
3. Drill holes as instructed.
NOTE: For Pre-Prepped 2 1/8” doors, you only need to drill top hole.

Step 3: Adjust Latch (if necessary) & Install
1. Adjustable latch (#3) is factory preset for a 2 3/8” backset.
2. For 2 3/4” backsets, slide the Cam assembly on the latch to 2 3/4”.
3. Insert latch into door and secure with Wood Screws (#11).

Step 4: Install Support Pin & Hex Bolts
Install Brass Support Pin (#14) into either hole on Outside Body as shown in the figure to the Right.

Install/screw Hex Bolts into the top and bottom of the Outside Body as shown in the figure.

Step 5: Verify Correct Spindle Length
1. With latch (#3) installed, hold the Inside Body (#2) and Rubber Trim Plate (#4) to the door.
2. Place Spindle (#7/8) through latch, into the Inside Body, as far as possible.
3. Spindle should extend from exterior of door 3/8” min. – 5/8” max.
4. If the 30-45 mm (#8) is too long, cut it to the correct length.
IMPORTANT: If spindle extends less than 3/8” it may not engage the lock. If spindle extends more than 5/8”, it will cause the lock to bind.

Step 6: Determine Knob Turn Direction (to unlock)
The lock is preset to unlock when turned clockwise after combination is entered.

If desired, you can unlock the door with a counter-clockwise turn. Remove the two blue screws and move the pin to the opposite side as shown.

*2230 DC – Inside Body pin must on opposite side from Outside Body.

Step 7: Install the Lockey 2230/2435
1. Place the Rubber Trim Plate (#3) on the backside of the Outside Body (#1).
2. Place the Outside Body on the door. The hexagonal bolts should extend into the top and bottom holes.
3. The Support Pin (#14) on the Outside Body should fit into and extend through the hole in the Latch (#3).

INSTRUCTIONS CONTINUED ON REVERSE SIDE
Step 7 cont: Install the Lockey 2230/2435

1. Insert the Spindle (#7/8) into the Outside Body (#1) ensuring it’s in the proper angled position. *(SEE FIGURES BELOW)*
2. Using a screwdriver, secure the lock to the door with the Screws (#9 or #10). *Screw length is dependent on door thickness.*
3. Test the operation of the Latch by turning the inside knob/lever.
4. Locate position where Latch strikes door frame and install Mortised Strike (#5) and Strike Plate (#6).

*IMPORTANT: SPINDLE POSITION/ANGLE

CLOCKWISE TURN TO UNLOCK WITH COMBINATION
The 2230/2435 is factory preset to unlock with a clockwise turn when the combination is entered. The Spindle MUST be placed through the latch, at a 10:00 – 4:00 angle as shown.

COUNTER-CLOCKWISE TURN TO UNLOCK WITH COMBINATION
If desired, the 2230/2435 can be unlocked with a counter-clockwise turn when the combination is entered. To unlock the 2230/2435 with a counter-clockwise turn, please refer to Step 6 to change the Handing Pin.

After changing the Handing Pin, the Spindle MUST be placed through the latch at a 2:00 – 8:00 angle as shown.
