

### WHY LOCKEYUSA?

#### TAKE IT FROM THE PROS

"I recommend using a LockkeyUSA mechanical lock for gates because it doesn't have batteries or electronics, and that's the way to go for exterior projects. It's the product I trust."

– Mykel Hicks, Hicks Exterior Accents

"My clients know we'll bring the best, and that includes LockkeyUSA locks."

– Matt Martinez, AGF Custom Metal Concepts

## WHY CHOOSE A KEYLESS LOCK?

The benefits of keyless locks are endless—no more fumbling for keys to unlock the gate; never worrying about keys being lost, copied, broken or stolen; and no stress about being available to let someone in the gate. Traditional keyed locks can be bumped and picked, but not mechanical keyless locks by LockeyUSA™.

## WHY MECHANICAL?

LockeyUSA Mechanical Keyless Locks are weather resistant and completely mechanical, with no batteries or wires, making them ideal for gates and exterior applications. When you choose a LockeyUSA Mechanical Keyless Lock for your gate, you're choosing a product backed by a Lifetime Mechanical Warranty.

## KEYLESS LOCK CONSIDERATIONS

### Double Combination Locks

If your gate can be reached through, you will want to install a LockeyUSA Double Combination lock that requires a code from both sides of the gate. This will prevent someone from reaching through the gate to gain access.

### Coastal Areas

If you are in a coastal area, we recommend choosing a marine grade finish, designed to extend the life of the finish when exposed to corrosive elements of coastal/saltwater environments. LockeyUSA locks come in two marine grade finishes, Jet Black Marine Grade and Satin Chrome Marine Grade.

## KEYLESS LOCKS + WELDABLE GATE BOXES

**2835**  
Mechanical Keyless  
Lever Lock with  
GB2500 Gate Box
